Peeyush Gupta

Salesforce Developer

peeyushgupta002@gmail.com | +91-6376277506 | Rajasthan, India | linkedin.com/in/peeyushweb

PROFESSIONAL SUMMARY

Salesforce Developer with 1+ year of experience building Apex, Lightning Web Components, and REST API integrations. Experienced in Agile/Scrum delivery, Jira-based workflows, Git version control, and writing Apex test classes. Proficient in SOQL, SOSL, bulkified Apex, Asynchronous processing, and Platform Events. Comfortable working within a structured release process of building, testing and deploying code.

WORK EXPERIENCE

Salesforce Developer - Aavas Financiers | May 2025 – Present

- Built custom Apex and LWC features by translating business requirements of lending and payment operations of an NBFC into scalable solutions , covering **REST API integrations**, **Case Management**, and **Lightning Components**.
- Developed payment components integrating **multiple REST APIs** for payment links, QR code generation, and external system transactions, improving payment processing flexibility and user experience.
- Implemented **session-resume and state-persistence logic** across multi-screen LWCs to preserve transaction state, reducing user drop-offs and enabling automation for complex payment scenarios.
- Built Apex test classes using a **TestDataFactory** for reusable test data and **HttpCalloutMock** to mock REST callouts, ensuring reliable, org-independent coverage.
- Work in Scrum sprints with Jira, using **Bitbucket** feature branches and pull-request reviews to move changes through **sandbox, UAT and production.**

Associate Software Developer Intern - Cyntexa Labs | November 2024 – April 2025

- Passed rigorous internal benchmarks for **Salesforce Admin** including **Flows, Data Security, Data Modeling, Profiles, Roles, Permission Sets**, and **User Setup**.
- Built full-stack applications with **Admin, Apex, and LWC** - Student Registration App, Toll Management, Football Tournament, and Hotel Management.
- Created **Reports and Dashboards** for case monitoring, reducing manual reporting effort and speeding up decision-making across operations.

Database Intern - MP Office | August 2023 – September 2023

- Applied **normalization** to reduce data redundancy by 30% and optimized SQL query performance by up to 25%, keeping 90% of website data operations within enterprise-level performance.
- Developed a **Twitter Sentiment Analysis Model in Python** to analyze public discourse on Indian politics.

TECHNICAL SKILLS

- **Languages:** Apex, SOQL, SOSL, SQL, JavaScript, HTML, CSS, Python
- **Salesforce:** Lightning Web Components, Apex Triggers, Batch and Queueable Apex, Platform Events, Flows, REST API Callouts, Apex Test Classes, Governor Limits, Admin
- **Clouds/Platforms:** Salesforce CRM Platform, Service Cloud
- **Tools and Process:** Git, Bitbucket, Jira, VS Code, Data Loader, Loom, Agile/Scrum, Sprint Planning, CI/CD Concepts
- **Concepts:** Object-Oriented Programming, Bulkification, Asynchronous Processing

PROJECTS

End-to-End Loan Lifecycle Payment Integration

- Architected an API-led integration between LWC components and third-party payment gateways using **RESTful Apex Callouts** for real-time transaction processing within the Loan Origination System (LOS).
- Implemented an **Event-Driven Architecture** with **Platform Events** and **Asynchronous Apex (Queueable/Batch)** to trigger automated Payment Realization in the Loan Management System (LMS).

Bulk Case Approvals Management

- Engineered a high-performance **Approval Automation Framework** using LWC and Apex Controllers, processing **200+ records per transaction within governor limits** using bulkified Apex.
- Implemented advanced **SOQL** queries and Apex logic to dynamically fetch and filter pending approvals, reducing manual clicks and accelerating the case cycle.

CERTIFICATIONS

- Salesforce Platform Developer I – In progress

EDUCATION

Poornima College of Engineering | May 2025
Bachelor of Technology, Computer Science | CGPA: 8/10

Aravali Public School | May 2020
CBSE 10th: 87.2% | CBSE 12th: 78.8%

POSITIONS OF RESPONSIBILITY

Founding Organizer - Hack It Sapiens | December 2022 – Present

- Organized 2 successful seasons of a 36-hour National Hackathon with 135+ teams, 110+ submitted projects, 40+ sponsors, and 65+ community partners.

Captain, Hayagriva Racing Club and Council Member - Students' Council | October 2022 – September 2023

- Served as Captain at Poornima College's Go-Kart Racing Team in national racing events, including Buddha Int. Circuit and represented the student body in the Students' Council, contributed in team coordination, and decisions that supported student participation and campus engagement.

ACHIEVEMENTS

Winner - Ideathon: JECRC University | December 2022

- Awarded 'Best Project' and a cash prize of 50,000 INR for ideating an IoT-enabled smart wheelchair for the specially-abled, using tongue-sensitivity sensors for hands-free mobility.
